

My husband is on the road a lot and the traffic and weather channels are important to him. They make him aware of potential upcoming problems so he can adjust his route or his trip.

Satellite Radio also provides us with STATIC FREE radio which is so nice. I never wanted to go with him because he listened to talk radio and there was always so much static you couldn't hear and my husband would turn up the volume which didn't help the distortion at all. Satellite Radio provides variety and quality that is unavailable anywhere else.

Thank you
